

Declaration of the Management of "Converse Bank" CJSC

We are responsible for drafting and approval of authentic and reliable financial statements on the Bank's financial position. Henceforth the Bank Management is in charge of:

- selection of accounting policy, its approval by the Board and consecutive implementation,
- substantiated appraisal and calculations,
- adherence to international accounting standards, in case of deviations from international accounting standards notifications attached to financial statements for disclosure of deviations,
- accurate keeping of accounting records,
- drafting financial statements on the basis of the Bank's uninterrupted operation.

The Bank enforces an effective and reliable system of internal control in line with minimum standards as specified by the RA Central Bank;

The Bank applies a functional accounting system in line with the RA Legislation and international accounting standards, providing in time and valid information on the Bank's financial position;

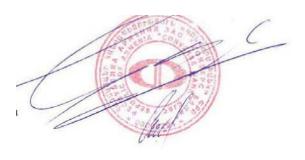

The Bank takes appropriate actions to identify and prevent any frauds, inaccuracy or errors, and ensure security of assets in the Bank.

Executive Director

Tigran Davtyan

Chief Accountant

Gohar Harutyunyan

CONVERSE BANK CJSC NOTIFICATIONS ENCLOSED WITH FINANCIAL STATEMENTS AS OF 30.09.2013

Notification 1. "Legal framework and corporate management"

Main Activities

"Converse Bank" CJSC was founded in the Republic of Armenia as a closed joint-stock company. The Bank received Banking License #57 dated November 28, 1994 by the Central Bank of Republic of Armenia (hereinafter – the RA CB). The Bank functions in compliance with the RA Legislation, regulatory statements of the RA Central Bank and other departmental authorities as well as its own Charter and internal statements. The Bank offers a large variety of financial and bank services, and operates through its Head Office located in the capital, and its 33 branches are located in Yerevan and in different regions, and 1 branch is located in NKR:

Business environment of Armenia

The political and economical environments of Republic of Armenia undergo certain instability in the current stage of economic development. This may have impact on business activities of local enterprises. Consequently, any activities in the business environment of Armenia are connected with risks that are not typical for other markets. The present financial statements give the ongoing assessment of managers relating to possible impact of the current economic circumstances on the financial performance and operations of the Bank. Anyway, the condition of the business environment in the future may differ from the assessment of managers

The Armenian Saint Apostolic Church represented by Mother See of Holy Etchmiadzin Catholicosate -5%.

4. The Bank Management is remunerated pursuant to employment agreements and the Staff Members List approved by the Bank.

Notification 2. "Accounting Policy"

Performance basis

Declaration on adequacy

These financial statements have been prepared in compliance with International Financial Reporting Standards (IFRS).

Measure basis

The financial statements have been prepared on the basis of the actual cost principle, for financial assets and liabilities recorded at their actual value and adjustable by the financial results, as well as for assets available for sale, except for those assets, the actual cost of which cannot be determined. Other financial assets and liabilities, as well as non-financial assets and liabilities are recorded with amortization or historical value.

Measure and submission currency

The national currency of the Republic of Armenia is the dram of RA. The management has specified AMD as the measure currency, since AMD reflects the economic essence of developments and circumstances that underlie the Bank's activity. AMD is also the submission currency of these financial reports.

The financial information is stated in thousand drams.

Use of estimates and observations

In order to prepare these financial statements in accordance with the requirements of IFRS, the management has developed a number of estimates and assumptions related to presentation of assets and liabilities, as well as disclosure of conventional liabilities and assets. The actual results can be different from the estimates.

Accounting policy

The below specified accounting policy was applied for preparation of the financial statements. The accounting policy has been applied consistently.

Recognition of income and expenses

Income is recognized in case when it is likely that economic profits will flow to the Bank and the received income can be measured reasonably. Expense is recognized when it is likely that economic profits will flow out of the Bank and the expense can be measured reasonably.

Interest income and expense are recognized in the integral report on financial results, by means of application of the effective interest rate method. Interest income and expense comprise amortization of the difference between the discount, extra charge, or the original balance cost of the interest bearing instrument and the payable amount, calculated on the basis of the effective interest rate.

The discount interest and extra charge accrued to financial instruments recorded by their actual cost adjustable by the financial results are recognized in the financial results as net profit/loss from the financial instruments recorded by their actual cost reappraised on the basis of the financial results.

Loan disbursement, service and other fees, which constitute an integral part of the general profitability of the loan, are deferred together with other direct expenses and are amortized to the interest income within the estimated term of the financial instrument, by means of application of the effective interest rate method.

Other commission fees and other income and expense items are recognized when the relevant service is rendered.

Dividend income is recognized on the day of recording the dividend in the financial results.

Foreign currency transactions

Transactions with foreign currency are converted into AMD at the exchange rate set as of the transaction date. As of the accounting date, the monetary assets and liabilities in foreign currency are converted into AMD at the exchange rate specified for that day. Non-monetary assets and liabilities presented at their original cost and expressed in foreign currency are converted into the measure currency at the exchange rate specified for that day. The foreign currency differences deriving from the conversion are recognized in the integral report on financial results.

As at the end of third quarter, the exchange rate was 405.29 AMD = 1 USD (as of September 30, 2012 the rate was 406.25 AMD = 1 USD)

Taxation

In the line of profit, the profit tax is composed of current and deferred taxes.

The profit tax is recognized in the integral report on financial results, except for the part that refers to capital items directly recognized in the equity capital, in which case the profit tax is recognized in the equity capital.

The current tax is the estimated amount payable against the taxable profit of the year, calculated by means of application of those tax rates, which acted as of the accounting date and the adjustments made in the part of taxes paid during previous years.

Deferred taxes are calculated in accordance with the liabilities method of the report on financial situation, which takes into account all time differences between balance amounts of assets and liabilities recognized in the financial statements and amounts calculated for tax purposes.

Deferred tax assets are recognized only to the extent to which it is likely that taxable profit will be earned, against which temporary differences, unutilized tax losses and benefits can be used. Deferred tax assets are decreased to the extent to which it is not likely that the relevant tax profit will be earned.

The monetary funds and their equivalents

The Bank considers as monetary funds and their equivalent the cash funds, the funds kept at the CB RA (except amounts deposited for the purpose of mutual settlements made through ArCa payment system) and accounts held with correspondent banks, which can be converted into cash within a short period of time and are not exposed to any considerable risk of cost changes.

Precious metals

Gold and other precious metals are recorded at CBA prices which approximate fair values and are quoted according to London Bullion Market rates. Changes in the bid prices are recorded in net gain on operations with precious metals in other income/expense.

Financial instruments

Classification

Financial assets are classified by the bank into the following categories: financial assets recorded at the actual cost and adjustable by the financial results, investments kept till maturity, loans and receivables, financial assets available for sale. Such classification of investments is done at the time of purchase, based on the estimates made by the Bank management, taking into account the goals of purchase.

Financial assets and liabilities recorded at the actual cost and adjustable by the financial results are those, which:

- have been purchased or originated with the purpose of selling or purchase back in the near future,
- a part of the separate portfolio of financial instruments' managed together, in case of which there have been past cases of obtaining short-term profit,
- derivative financial instruments (except specified derivative financial instruments and effective hedging transactions), or
- at the time of initial recognition were recognized by the Bank as assets and liabilities recorded at the actual cost and adjustable by the financial results.

The profit and losses that originate after the adjustment are recognized in the integral report on financial results.

The Bank considers financial assets and liabilities as assets and liabilities recorded at the actual cost and adjustable by the financial results in case if:

- the assets or liabilities are managed and assessed by the actual cost principle,
- their definition as such excludes or considerably reduces the accounting discrepancy that would occur under other circumstances, or
- the asset or liability contains a derivative, which considerably changes those cash flows, which would otherwise arise under the agreement.

Commercial derivative instruments that imply potentially favorable conditions (positive actual cost), as well as purchased options, are represented as assets. Commercial derivative instruments that imply potentially unfavorable conditions (negative actual cost), as well as provided options, are represented as liabilities.

After the initial recognition, financial assets and liabilities recorded at the actual cost and adjustable by the financial results are not reclassified.

Disbursed loans and receivables are non-derivative financial assets with fixed or determinable payments, which do not have a quoted market price at the current market, except for those:

- which the Bank intends to sell immediately or soon afterwards,
- which the Bank, at the time of initial recognition, defines to be recorded at the actual cost and adjustable by the financial results,
- which the Bank, at the time of initial recognition, defines as available for sale, or
- with regard to which the Bank will not recover its investment completely through various reasons of loan aggravation.

Investments kept till maturity are non-derivative financial assets with fixed or determinable payments and fixed repayment term, which the Bank intends and has the opportunity to keep till their maturity.

Investments kept till maturity are recorded at their amortization cost, by means of application of the effective interest rate method minus the provision for their deterioration.

If the Bank's intention or opportunities change and it is no longer possible to record the investments kept till maturity at their amortization cost, or if it becomes possible to measure reasonably the actual cost of the financial asset, which was impossible before, then the bank records the asset at its actual cost and recognizes the profit and loss resulting from the cost changes in the integral report on financial results, if the assets have been reclassified as income recorded at the actual cost adjustable by the financial results and other comprehensive income, if the asset was reclassified as available for sale.

Assets available for sale are those assets, which are intended for sale or are not classified as disbursed loans, receivables, investments kept till maturity, or financial instruments measured by their actual cost.

Recognition

Financial assets and liabilities are recognized in the report on financial situation when the Bank becomes a party to the contract on the financial instrument.

Measuring

The financial asset or liability is initially recognized at its actual cost (which is normally its initial cost) plus expenses related to the transaction, except for the expenses related to those transactions, which have been classified as financial instruments recorded at the actual cost and adjustable by the financial results.

After initial recognition, the financial assets, including derivative instruments considered as assets, are measured at their actual cost, without deduction of the expenses related to the transaction, which might occur through sale or alienation in some other manner, except for the following:

- disbursed loans and receivables, measured at their amortization cost by means of application of the effective interest rate method;
- investments kept till maturity measured at their amortization cost by means of application of the effective interest rate method, and
- investments in equity capital instruments, which do not have any quoted market price at the current market and are measured at their original cost.

After initial recognition, the majority of the financial liabilities are measured at their amortization cost, except those financial liabilities, which are specified as financial instruments measured at the actual cost, the profit and losses deriving from adjustment of which are recognized in the integral report on financial results, as well as those financial instruments, which originate when transfer of a financial asset measured at its actual cost does not comply with the criteria of de-recognizing. Extra charges and discount amounts, including the initial expenses related to the transaction, are included in the balance cost of the instrument and are amortized at the effective interest rate of the instrument.

Principles of measuring the actual cost

The actual cost of financial instruments is based on the market price quoted as of the accounting date, without deduction of the expenses related to the transaction. If no quoted market price is available, the actual cost of the instrument is determined by means of cost definition models or the techniques of discounted cash flows.

In case of application of the techniques of discounted cash flows, the estimated future cash flows are based on the best estimates made by the management, and the discount rate is the relevant market interest rate applicable towards this instrument under similar conditions, as of the accounting date. In case of application of cost definition models, the market data of the accounting date are used in the model

The actual cost of derivative instruments circulating at stock exchange is estimated at the amount, which the Bank will receive or pay as of the accounting date in case of termination of the agreement, taking into account the current market conditions and current solvency of the parties to the agreement.

Profit and loss deriving from further measuring

Profit or loss deriving from changes in the financial assets and liabilities are recognized in the following manner.

- profit or loss deriving from financial instruments recorded by their actual cost adjustable by the financial results are recognized in the financial results;
- profit or losses deriving from financial assets available from sale are recognized in other aggregate income (except for losses deriving from deterioration and profit and losses deriving from foreign currency differences) until de-recognizing of the asset, when the whole profit or loss previously recognized in other aggregate income is recognized in the financial results. The interest in line of the asset available for sale is recognized in the financial results, by means of application of the effective interest rate method.

Profit or losses deriving from financial assets recorded at their amortization cost are the integral report on financial results, when a financial asset or liability is de-recognized or depreciated, as well as through amortization.

De-recognizing

A financial asset is de-recognized, when the validity term of using the right to receive cash flows from the financial asset expires or when the Bank transfers almost all risks and profit related to asset ownership. All those rights or obligations, which occurred or were retained at the time of transfer, are recognized separately as assets or liabilities. A financial liability is de-recognized when it is repaid, invalidated or expired.

The Bank de-recognizes certain assets also in case when balances of non-collectible assets are written off.

Repo and reverse repo agreements

Securities sold through repo agreements are recorded as secured financial instruments, in case of which the securities remain recorded in the report on financial situation and the liability is included in the amounts payable under repo agreements. The difference between the repurchase prices is the interest expense, which is recognized in the financial results during the term of the repo agreement, by means of application of the effective interest rate method.

Securities purchased through repo agreements are recorded in the amounts receivable under repo agreements. The difference between the repurchase prices is the interest income, which is recognized in the financial results during the term of the repo agreement, by means of application of the effective interest rate method.

If the securities purchased through repo agreements are sold to a third party, the obligation to return the securities is recorded as a commercial liability and is measured at its actual cost

Fixed assets

Own assets

Fixed assets are presented at their original cost minus accumulated deterioration and losses from devaluation, except buildings reflected at the revaluated cost.

When an item of fixed assets is composed of different term large components of useful service, these components are recorded as separate items of fixed assets.

Leased assets

Such lease, under which almost all risks and profits related to the asset ownership are transferred to the Bank, is a financial leasing. Equipment purchased through financial leasing is recorded at the minimum of the actual cost and the current cost of the minimal lease payments at the beginning of the lease, minus accumulated deterioration and losses from devaluation.

Reappraisal

The Bank buildings are reappraised on regular basis. Regularity of reappraisal depends on the changes in the actual cost of reappraised buildings. When the balance cost of a building increases in the result of reappraisal, the increase is recognized directly in the equity capital. But when such increase covers the decrease resulted from the previous reappraisal and recognized in the integral report on financial results, it is recognized in the integral report on financial results. When the balance cost of a building decreases in the result of reappraisal, the decrease is recognized in the financial results. But when such decrease covers the increase resulted from the previous reappraisal and recognized in the equity capital of the same assets, it is recognized in the equity capital.

Deterioration

Deterioration is recognized in the integral report on financial results, by means of application of the linear method during the useful life of the fixed assets. Calculation of depreciation starts from the date of purchase of the fixed asset, and in case of in-house constructed assets – from the date of

commissioning. No deterioration is calculated towards land. The estimated periods of useful life are as follows.

| | Useful life (years) | Interest rate (%) | |
|--------------------|------------------------|-------------------|--|
| | | | |
| Buildings | 20 | 5 | |
| Computers | 1 | 100 | |
| Transport means | 5 | 20 | |
| Equipment | 5 | 20 | |
| Other fixed assets | 5 | 20 | |

Capital expenditures on leased fixed assets are capitalized and amortized on linear basis at the shortest of the following two terms: lease term or useful life of the asset.

Intangible assets

Intangible assets purchased by the Bank are presented at their original cost minus accumulated losses from amortization and depreciation.

Amortization is recognized in the integral report on financial results, by means of application of the linear method during the useful life of the intangible assets. The estimated periods of useful life are as follows:

| | Useful life (years) | Interest rate (%) |
|--------------------------------|------------------------|-------------------|
| Computer software and licenses | 1-10 | 100-10 |

Depreciation

Financial assets recorded at amortization cost

Financial assets recorded at amortization cost comprise loans and other receivables ("loans and receivables"). The Bank regularly revises the loans and receivables for the purpose of appraising depreciation. A loan or receivable is depreciated and depreciation losses are recognized only in case when there is an impartial testimony about depreciation resulting from one or more occasions after initial recognition, and this case (or cases) affects the estimated future flows of the loan funds, which can be measured reasonably.

The impartial testimony about depreciation might comprise non-fulfillment of obligations or delay of payments on the part of the borrower, violation of the loan agreement terms and conditions by the borrower, such revision of the terms and conditions of the loan, which the Bank would not consider under other circumstances, evidence of bankruptcy of the borrower or issuer, abatement of the current market of securities, decrease of the collateral value, or other available data regarding the group of assets, such as impairment of solvency of the borrowers included in the group, or changes in the economic conditions related to non-fulfillment of obligations by the borrowers included in the group.

First of all, the Bank assesses separately whether there is an impartial testimony about depreciation with regard to such loans and receivables, which are significant when considered separately, and by groups with regard to such loans and receivables, which are not significant when considered separately. If the Bank concludes that there is no impartial testimony on a separately assessed loan or receivable, whether significant or not, such loan will be included in the group of loans and receivables with similar parameters and the Bank will make a group appraisal for the purpose of revealing signs of depreciation. Those loans and receivables, for which depreciation assessment was made separately and against which depreciation losses were or still are recognized, will not be included in the group assessment of depreciation.

If there is impartial testimony on losses resulting from depreciation of a loan or receivable, the size of loss is measured by the difference between the balance cost of the loan or receivable and the current cost of the estimated future cash flows, including the amounts discounted from guarantees and collateral at the initial effective interest rate of the loan or receivable. Cash flows estimated under the agreement and losses based on the past experience, in the line of which adjustments were made on the basis of the available data that reflect the current economic conditions, are the basis for assessing the expected cash flows.

In certain cases, in order to assess the loss from depreciation in the line of the loan or receivables, the required information might be limited or not fully compliant with the present conditions. This can be in case when the borrower has financial difficulties and the Bank does not possess sufficient data regarding similar borrowers. In such cases, the Bank assesses the amount of loss from depreciation, based on its experience and assumptions.

Losses from depreciation in the line of loans or receivables are recognized in the financial results and are reversed only in case when further increase of the reimbursed amount can be objectively attributed to developments after recognition of the loss from depreciation.

In cases when it is impossible to collect the loan, it is written off at the expense of the depreciation provision. The Bank writes off the loan balance, when the Bank management decides that the loan is not subject to collection and all the necessary measures have been taken with regard to repayment of the loan.

Financial assets recorded at their original cost

The financial assets recorded at their original cost comprise non-quoted instruments of the equity capital included in the assets available for sale, which are not recorded at the actual cost, since the latter cannot be reasonably assessed. If there is an impartial testimony to evidence that such investments are depreciated, the loss from depreciation is the difference between the balance cost of the investment and the current cost of the future estimated cash flows discounted at the market interest rate of a similar financial asset.

Losses from depreciation of such investments are recognized in the financial assets and are not subject to reversion.

Non-financial assets

On each accounting date, other non-financial assets, except deferred taxes, are revised for the purpose of revealing signs of depreciation. The reimbursable amount of non-financial assets is determined as the actual cost minus the highest of the expenses from selling and the usage costs. When determining the usage cost, the estimated future cash flows are discounted, applying before taxation the provision, which reflects the current appraisal of the market of the time risk of money and the risk peculiar to the asset. In case of assets, which do not generate cash flows significantly independent of other assets, the reimbursable amount is determined for the money-yielding group, which comprises the particular asset. The loss from depreciation is recognized when the balance cost of the money-yielding unit exceeds its reimbursable amount.

The losses from depreciation of non-financial assets are recognized in the integral report on financial results, and are reversed only in case when the estimates applied for determination of the reimbursable amount have changed. The loss from depreciation is reversed only to the extent to which the balance cost of the asset does not exceed the balance cost, which would have been determined after deducting deterioration or amortization, if no loss from depreciation had been recognized.

Reconsidered loans

Revision of loans might result in extension of the loan maturity and establishment of new conditions of loan repayment. If the loan conditions are revised, the loan is no longer considered overdue. The managers constantly supervise the loans with revised conditions to make sure that all arrangements are observed and future payments will be made. The loans remain the subject of individual or group assessment of depreciation, by means of application of the initial effective interest rate of the loan.

Credit instruments

During its regular activity, the Bank applies credit instruments, which comprise outstanding credit lines, letters of credit, and guarantees, and provides other types of lending security.

Financial guarantees are agreements that oblige the Bank to make certain payments to reimburse those losses, which the guarantee owner would suffer, if the individual debtor had not been able to make payments within the term of the debt instrument.

A liability in the line of a financial guarantee is originally recognized at the actual cost, leaving out the expenses connected with the instrument, and afterwards it is measured by the higher of the two values: the originally recognized cost minus the accumulated amortization or the loss provision in the line of the guarantee. The loss provision in the line of financial guarantees and other credit instruments are recognized, when there is probability of loss and this loss cannot be reasonably measured.

Liabilities in the line of financial guarantees and provisions for other credit instruments are included in the structure of other liabilities.

Assets held for sale

A non-current asset is classified as held for sale if it is highly probable that the asset's carrying amount will be recovered through a sale transaction rather than through continuing use. Such sale transaction shall be principally completed within one year from the date of classification of an asset as held for sale. Assets held for sale are measured at the lower of their carrying amount and fair value less costs to sell. If the fair value less costs to sell of an asset held for sale is lower than its carrying amount, an impairment loss is recognized in the income statement as loss from assets held for sale. Any subsequent increase in an asset's fair value less costs to sell is recognized to the extent of the cumulative impairment loss that was previously recognized in relation to that specific asset.

Grants

Grants relating to the assets are included in other liabilities and are credited to the income statement on a straight line basis over the expected lives of the related assets.

Reserves

Reserves are recognized in the report on the financial results when the Bank has an actual or constructive obligation resulting from past experience and it is probable that outflow of economic profit will be required for repayment of this obligation. If the impact is significant, the provision is determined by discounting the future expected cash flows before taxation, at a rate that reflects the current market estimate of the temporal cost of money and, if applicable, the risks inherent to the obligation.

Share capital

Dividends

The Bank's capability to announce and pay dividends is regulated by the relevant procedures specified by the legislation of the Republic of Armenia. Dividends on equities are reflected as allocation of outstanding dividends within the period of time, when they were announced.

Extra payment for shares

Any amount paid above the par value of shares is considered as extra payment for shares.

Offsetting

Financial assets and liabilities are offset by being reflected in the report on financial situation, if there is a legally fixed right to offset recognized amounts, as well as an intention to make the calculation by the net basis or sell the asset and simultaneously repay the liability.

| Non-commercial institutions | 120,508 | 7,354 |
| Total loans and advances to customers | 77,169,406 | 64,948,722 |
| Less allowance for loan impairment | (2,882,596) | (5,215,814) |
| Total loans and advances to customers | 74,286,810 | 59,732,908 |

Loans to individuals comprise the following products:

| In thousand Armenian drams | 30.09.13 | 31.12.12 |
|---|------------|------------|
| Mortgage loans | 14,561,430 | 12,606,053 |
| Consumer loans | 24,527,417 | 20,609,076 |
| Car loans | 1,289,707 | 1,571,503 |
| Other | 623,159 | 849,756 |
| Total loans and advances to individuals (gross) | 41,001,713 | 35,636,388 |

The finance lease receivables may be analyzed as follows:

| In thousand Armenian drams | 30.09.13 | 31.12.12 |
|--|----------|----------|
| Gross investment in finance leases, receivable: | | |
| Not later than 1 year | 37,236 | 44,078 |
| Later than 1 year and not later than 5 years | 179,398 | 153,990 |
| | 216,634 | 198,068 |
| Unearned future finance income on finance leases | (48,602) | (43,661) |
| Net investment in finance leases | 168,032 | 154,407 |

The allowance for uncollectable finance lease receivables included in the allowance for impairment amounted to AMD 1,680 thousand at 30 September 2013, and AMD 1,544 thousand at 31 December 2012.

Notification 20. « Investment securities»

| Investment securities | 30.09.13 6,085,947 | 31.12.12 5,387,527 |
|--|------------------------------|-----------------------|
| Corporate bonds | 0 | 95,945 |
| Securities issued by the Ministry of Finance | 5,650,335 | 4,926,555 |
| Shares of Armenian companies | 123,022 | 107,794 |
| Shares of OECD countries companies | 312,590 | 257,233 |

All debt securities have fixed coupons.

All unquoted RA available-for-sale equities are recorded at cost less allowance for impairment since their fair value cannot be reliably estimated. There is no market for these investments and the Bank intends to hold it for the long term.

The fair value of unquoted available-for-sale debt securities is measured using a valuation technique, which uses current market rates to discount future cash flows of the financial instruments.

Notification 29."Other Provisions"

The movement in other provisions was as follows:

| Other provisions | 01.01.13-30.09.13 | 01.01.12-30.09.12 |
|--|-------------------|-------------------|
| Beginning balance | 9,713 | 40,699 |
| Net provisions to the reserve / (recovery) (Writing off)/ return | 7,288 | (21,430) |
| Ending balance | 17,001 | 19,269 |

Provisions have been made in respect of costs arising from guarantees.

Notification 31. "Total equity"

As at 30 September 2013 the Bank's registered and paid-in share capital was AMD 4,860,033 thousand (2012: AMD 4,860,033 thousand).

In accordance with the Bank's statues, the share capital consists of 16,200 ordinary shares, all of which have a par value of AMD 300,000 each and of 333 privileged shares, all of which have a par value of AMD 100 each.

The respective shareholdings as at 30 September 2013 and 31 December 2012 may be specified as follows:

| In thousand Armenian drams | | 30.09.2013 | | 31.12.2012 |
|---|-----------------------|-------------------------------|-----------|----------------------------|
| | Paid-in share capital | % of total paid-in capital | | % of total paid-in capital |
| Advanced Global Investments LLC | 4,617,000 | 95 | 4,617,000 | 95 |
| Advanced Global Investments LLC (preference shares) | 33 | - | 33 | - |
| Saint Apostolic Church of Armenia | 243,000 | 5 | 243,000 | 5 |
| | 4,860,033 | 100 | 4,860,033 | 100 |

As at 30 September 2013, the Bank did not repurchase any of its own shares. The holders of ordinary shares are entitled to receive dividends as declared and are entitled to one vote per share at annual and general meetings of the Bank.

The preference shareholders are entitled to receive annual dividends amounting 20% of the nominal value of the shares they own if decision on dividend payment is made by authorized body.

The share capital of the Bank was contributed by the shareholders in Armenian Drams and they are entitled to dividends and any capital distribution in Armenian Drams.

Distributable among shareholders reserves equal the amount of retained earnings, determined according to the Armenian legislation. Non-distributable reserves are represented by a reserve fund, which is created as required by the statutory regulations, in respect of general banking risks, including future losses and other unforeseen risks or contingencies. The reserve has been created in accordance with the Bank's statutes that provide for the creation of a reserve for these purposes of not less than 50% of the Bank's share capital reported in statutory books.

Notification 32. « Liabilities »

The Bank constantly has to give loans such as approved loans, credit cards and overdrafts.

The Bank provides financial guarantees and letters of credit to guarantee liabilities of its customers to third persons. Usually these agreements are provided for fixed periods – up to one year.

In the table below are presented the unutilized parts of liabilities per types:

| | 30.09.2013 | 31.12.2012 |
|--|------------|------------|
| Contract amount | | |
| Guarantees and letters of credit | 1,700,083 | 971,322 |
| Loan line liabilities | 205,437 | 195,011 |
| Credit card liabilities | 142,633 | 173,864 |
| Unutilized parts of overdrafts | 4,476,120 | 4,955,238 |
| Letters of credit | 290,461 | 0 |
| Total liabilities with credit risk | 6,814,734 | 6,295,435 |
| Allowance for impairment of credit related commitments | (17,001) | (9,713) |
| Total liabilities with credit risk | 6,797,733 | 6,285,722 |

The above-stated total loan liabilities do not suppose any monetary claims in the future as these liabilities can be declared invalid or stopped before financing.

Conditional cases

Legal liabilities

The Bank management is not aware of any actual, incomplete or threatening cases instituted against the Bank.

Tax liabilities

The tax system of Armenia is comparatively new and is characterized with frequent amendments to laws, official interpretations and court decrees, which often are not quite clear, understanding, are contradicting and require explanations from tax bodies. The taxes are subject to check and examination by tax bodies, which are eligible to implement fines and penalties. In case of violation of tax legislation, the tax bodies are eligible to establish additional liabilities (tax, fines or penalties) only in three years after commitment date of violation.

These fact may provoke essential tax risk in Armenia as compared to other countries. The Bank management states that tax liabilities of the Bank are evaluated based on explanations, official declarations and court decrees provided by tax legislation of Armenia. Though, relevant authorized bodies may have other explanations, consequences can be essential for financial reports in any way.

Notification 33. « Transactions with related parties"

In accordance with IAS 24 Related Party Disclosures, parties are considered to be related if one party has ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. For the purpose of the present financial statements, related parties include shareholders, members of Bank's Management as well as other persons and enterprises related with and controlled by them respectively.

The ultimate controlling party of the Bank is Argentinean businessman E. Eurnekian.

A number of banking transactions are entered into with related parties. These include loans, deposits and other transactions. The volumes of related party transactions, outstanding balances at the year end, and related expense and income for the year are as follows:

Amounts due from and to financial institutions

For assets and liabilities maturing within one month, the carrying amount approximates fair value due to the relatively short-term maturity of these financial instruments. For the assets and liabilities maturing in over one month, the fair value was estimated as the present value of estimated future cash flows discounted at the appropriate year-end market rates, which are mainly the same as current interest rates.

Loans and advances to customers

The fair value of floating rate instruments is normally their carrying amount. The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity. Fair value approximates carrying amounts as current interest rates for new instruments reflect interest rate for instruments originated previously.

Other borrowings

The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using interest rates for new debts with similar remaining maturity. Fair value approximates carrying amounts as current interest rates for new instruments reflect interest rate for instruments originated previously.

34.1 Fair value Hierarchy

The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset and liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

| In thousand Armenian drams | As of | As of December 31, 2012 | | | | |
|---|---------|-------------------------|---------|---------|-----------|---------|
| | Level 1 | Level 2 | Level 3 | Level 1 | Level 2 | Level 3 |
| FINANCIAL ASSETS | | | | | | |
| Trading securities | - | 166,691 | - | - | 168,448 | - |
| Investments available for sale | - | 5,650,335 | - | - | 5,022,500 | - |
| Unquoted equity investments of OECD countries | - | 312,590 | - | - | 257,233 | - |
| Derivative financial assets | - | 0 | - | - | 2,135 | - |
| Total | - | 6,129,616 | | | 5,450,316 | |

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting period.

Unquoted RA equity securities

The fair value of Bank's investment in unquoted RA equity securities cannot be reliably measured and is therefore excluded from this disclosure. Refer to note 20 for further information about this equity investment.

Notification 35. « Minimum detections relating to financial risks"

Risk management is an essential factor for banking sector and an important element for the Bank operations. Main risks include interest rates and foreign currency market risks, as well as loan or liquidity risks.

The process of risk management is organized in accordance with the mission, principal and interim objectives of the Bank and is designed to improve the financial position and the reputation of the Company.

The risk management is organized and coordinated by the Executive Director in accordance with the internal legal acts approved by the Bank's Board.

The Board is responsible for the overall supervision of risk management and risk management policy, as well as approval of the policies related to the risk management, based on which the Bank's Executive Director organizes the risk management, taking into consideration the management limits and the requirements of the Bank's internal legal acts.

35.1 Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss for the Bank by failing to discharge an obligation. Credit risk is the most important risk for the Bank's business; management therefore carefully manages its exposure to credit risk. Credit exposures arise principally in lending activities that lead to loans and advances, and investment activities that bring debt securities and other bills into the Bank's asset portfolio. There is also credit risk in off-balance sheet financial instruments, such as loan commitments. The credit risk is managed in accordance with the Bank's credit policy and the internal legal acts regulating the sphere. The risk management division implements daily monitoring of the loan portfolio, calculation of dynamics based on the structured series and analysis of the quality of loan portfolio by products and branches, which is used for forecasting the qualitative indicators of the loan portfolio. The risk management division also conducts monitoring of different loan types in accordance with approved procedures, and monitors also other loans if it is necessary in case of worsening of the borrower's creditability. The loans issued by the Bank are also approved by the risk management division in accordance with the requirements of internal legal acts for reducing the credit risk. The credit risk management and control are centralised in Risk Management Division and reported to the Executive Board regularly.

Geographical concentrations

A sample analysis of geographical concentration of the Bank's financial assets is illustrated below:

Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, equipment, inventory and vehicles.
- Gold and cash

Longer-term finance and lending to corporate entities are generally secured; revolving individual credit facilities are generally unsecured. In addition, in order to minimise the credit loss the Bank will seek additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Generally no collaterals are required for provision of loans and advances to financial institutions, especially to Banks. The exception is collaterals obtained under repurchase agreements and securities borrowing transactions. Debt securities, treasury and other eligible bills are generally unsecured.

The analysis of gross loan portfolio by collateral is represented as follows:

| As of September 30, 2013 | As of December 31, 2012 |
|-----------------------------|---|
| 28,305,631 | 23,367,526 |
| 9,699,786 | 9,679,708 |
| 16,447,163 | 20,514,453 |
| 2,923,311 | 1,571,503 |
| 4,810,306 | 817,403 |
| 1,832,080 | 1,094,575 |
| 101,963 | 632,978 |
| 3,797,907 | 3,449,874 |
| 9,251,259 | 3,820,702 |
| 77,169,406 | 64,948,722 |
| | 28,305,631 9,699,786 16,447,163 2,923,311 4,810,306 1,832,080 101,963 3,797,907 9,251,259 |

The amounts presented in the table above are carrying values of the loans, and do not necessarily represent the fair value of the collaterals. Estimates of market values of collaterals are based on valuation of the collateral at the date when loans were provided. Generally they are not updated unless loans are assessed as individually impaired.

35.1.1 Depreciation and reserve policy

Main characteristics for assessment of loan depreciation are: delay of payment of principal loan and interests over 90 days, difficulties connected with loan flows of borrowers, loan rating reductions, and violation of provisional clauses of agreements. The Bank assesses depreciation either individually or by groups.

Individual assessment of depreciation

The Bank defines the size of relevant reserve of borrowing or loan on individual basis. While defining reserve amounts the following factors are taken into account – reliability of customer business plan, capacity of overcoming financial difficulties, planned earnings and payment of expected dividends in case of insolvency, possibility of other financial aid, and liquidity value of collateral, terms of expected cash flow. Losses from depreciation are assessed as of the day of the reporting period, if the unexpected circumstances don't take special attention.

Group assessment of depreciation

Group assessment is made for non-significant loans (credit cards, mortgages and non-secured consumer loans, inclusively), as well as for individually important loans and borrowings, which don't have evident characteristics of depreciation. Losses from depreciation are assessed each reporting period separately for each classified group.

Group assessment takes into account depreciation amount, which may occur in the portfolio, even if there is no objective evidence in the individual assessment. Losses from deprecation are assessed on account of the following data – history of losses in the portfolio, current economic situation, approximate date of the loss and individual disclosure, or payments expected in case of depreciation. Valuation of depreciation assessment and reserve of financial guarantees and letters of credit is implemented in the same day as for loans.

The below table presents quality of loan portfolio assessed per depreciation coefficients based on the history of losses.

Loans and advances individually impaired

The total gross amount of individually impaired loans and advances to customers before taking into consideration the cash flows from collateral held is AMD 4,006,900 thousand (2012: AMD 6,199,879 thousand).

35.2 Market Risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and foreign exchange rates. The Bank classifies exposures to market risk into either trading or non-trading portfolios. The market risk for the trading portfolio is managed and monitored based on a VaR methodology which reflects the interdependency

between risk variables. Non-trading positions are managed and monitored using other sensitivity analyses.

Foreign currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The currency risk is managed using the standard and VaR methodologies. The currency rates are monitored daily, based on which at the end of each month the currency rates are forecasted. The Board of Directors has set limits on positions by currency.

The below table shows those foreign currencies, which can have impact on non-commercial monetary assets, liabilities and cash flow of the Bank as of September 30 2013. The analysis calculates the impact of possible fluctuations of foreign currency against AMD on condition of keeping stable other alterations, on the report on financial results (connected with change of real value non-commercial assets and liabilities against foreign currency) and on capital (connected with change of real value of capital tools). The negative value in the table reflects the potential net reduction in the consolidated financial balance-sheet or in the capital, while the positive value shown potential net growth:

| AMD thousand | i | | | 30.09.2013 | | | 31.12.2012 |
|--------------|----------|-----------------------------|---|-------------------------|-----------------------------|-------------------------------------|-------------------------|
| | Currency | Change in FX rate, interest | Influence on profit before taxation | Influence on capital | Change in FX rate, interest | Influence on profit before taxation | Influence on capital |
| USD | | +5 | 851 | 681 | +5 | (1,151) | (921) |
| USD | | -5 | (851) | (681) | -5 | 1,151 | 921 |
| EUR | | +8 | 176 | 141 | +8 | 307 | 245 |
| EUR | | -8 | (176) | (141) | -8 | (307) | (245) |

The Bank has got assets and liabilities in a range of foreign currencies. The foreign currency risk appears, when actual or forecasted assets in foreign currency exceed or are less than liabilities in the same foreign currency.

The structure of the Bank assets and liabilities per currency as at September 30, 2013 is as follows:

| | AMD | I group CCY* | II group CCY** | Total |
|---|------------|-----------------|-------------------|------------|
| Assets | | | | |

Interest rate risk

35.2.1 Interest rate risk - Commercial portfolio

In order to calculate the risk of financial assets registered by reassessed real value (with loss/profit/ the Bank implements methods and approaches of Bazel 2 interest rate risk. According to the interest rate thereof the risk is established as consolidated sum of special interest rate and general risks.

With purpose of calculating interest rate risk the positions of debt securities are calculated by below principles against groups of debt securities. Debt securities used in the calculation of the same positions must:

- Must be issued by the same entity; and
- Expressed with the same currency; and
- Have same profitability, or difference between profitability earnings should not exceed 0.2 interest point.

The table below presents the interest rate risk of the Bank commercial portfolio.

| AMD thousand | Special risk | General risk | Total commercial securities risk |
|--------------------------|-----------------|--------------|---|
| As at September 30, 2013 | 6,254 | 18,953 | 25,207 |
| As at December 31, 2012 | 6,401 | 22,517 | 28,918 |

35.2.2 Interest rate risk - Non-commercial

^{**} II group CCYs includes the following ones: RUB, UAH, and BYB.

Interest rate risk is the risk of changes in the Bank income and financial tools portfolio as a result of changes in interest rates.

The following table shows sensibility of the Report on the Bank consolidated financial results on condition of leaving the alternating quantity unchanged.

Sensibility of the report on financial results in interest rates is the influence of expected changes on the net interest income of the quarter on the part of non-commercial financial assets and liabilities with fluctuating interest rates in the balance as of 30.09.2013. Accounting of the capital sensibility is made by revaluation of the assets available for sale and with fixed interest rates as of 30.09.2013, assuming as basis expected changes in interest rates.

Sensibility of the capital is analyzed per liquidity term of the assets. Total sensibility of the capital is based on the supposition that there are parallel alternations in the arch of profitability.

Liquidity Risk

Liquidity risk is the risk that the Bank will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily bases. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

Operational risk

The primary responsibility for the development and implementation of controls to address operational risk is assigned to the Executive Board of the Bank. Operational risk is the risk of incompatibility of the Banks' operations and procedures to the legislation in force or their breach, the lack of information of the Bank's staff and their errors, the losses from insufficiency of the functional properties of the information technologies and systems implemented by the Bank. The Bank's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Bank's reputation with overall cost effectiveness.

The operational risk management is conducted in a clear and documented manner for all the business processes described, through the internal legal acts regulating those business process, as well as limits for all the processes and operations, and double control mechanisms for all transactions. The more actual operational risk management is described below.

Legal risk: all the standard contract forms of the Bank are prepared by the Bank's Legal Department by cooperating with the Bank's appropriate departments and are approved by the Bank's Executive Board. In the Bank's day-to-day operations non standard contracts between the Bank and third parties are allowed only in case of appropriate conclusion from the Banks Legal Department.

The IT risks are managed in accordance with internal legal acts.

The risk mitigation mechanisms for the process are:

- Regulation of all business processes by internal legal acts,
- Physical protection of the Bank's assets and critical documents (including loans contracts)
- Establishing and maintaining limits,
- Common preservation of property and records,
- Implementation and archiving of data journals,
- Implementation of double control mechanism in recording transactions.

The internal audit periodically assesses the internal control system effectiveness and adequacy with the Banks risks and supervises the Bank's activity and operational risks.

The Bank's correspondence with the standards is accompanied by the internal auditor's periodic observations. The results of those observations are discussed by the Bank's management's appropriate representative to whom it concerns. The summaries of the observations are submitted to the Board.

Notification 36. « Capital and capital adequacy"

The Bank maintains an actively managed capital base to cover risks inherent in the business. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision ("BIS rules/ratios") and adopted by the Central Bank of Armenia in supervising the Bank.

The primary objectives of the Bank's capital management are to ensure that the Bank complies with externally imposed capital requirements and that the Bank maintains strong credit ratings and healthy capital ratios in order to support its business and to maximize shareholders' value.

The Bank manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. No changes were made in the objectives, polices and processes from the previous years.

The minimum ratio between total capital and risk weighted assets required by the Central Bank of Armenia is 12%.

Regulatory capital consists of Tier 1 capital, which comprises share capital, share premium, retained earnings including current year profit, and general reserve. Regulatory capital is calculated in accordance with the requirements of the Central Bank of Armenia and accounting standards of the Republic of Armenia. The other component of regulatory capital is Tier 2 capital, which includes revaluation reserves.

The risk-weighted assets are measured by means of a hierarchy of risk weights classified according to the nature of and reflecting an estimate of credit, market and operating risks.

The Bank has complied with externally imposed capital requirements through the period.

The Central Bank of Armenia has set the minimal required total capital at AMD 5,000,000 thousand from January 1, 2009.
